

## CONTENTS

### MODELS, ALGORITHMS AND SOFTWARE

**4 Bychkov I.V., Kenzin M.Yu., Maksimkin N.N., Kiselev L.V.** Evolutionary approach to group routing of autonomous underwater vehicles in dynamic multiobjective monitoring missions

### SYSTEMS AND TECHNOLOGIES

**13 Kropotov A.N., Plyasunov V.M., Makashov A.A.** Research of the videonavigation system as a part of underwater vehicle's control system circuit

**19 Veltishchev V.V.** Prospects for development of underwater hydraulic seawater

**29 Gerasimov V.A., Popov O.S., Filozhenko A.Yu., Chepurin P.I.** Thermal analysis of autonomous voltage inverter for contactless charge battery of the underwater robot

### FUNDAMENTAL PROBLEMS OF OCEAN ACOUSTICS

**37 Kasatkin B.A., Zlobina N.V., Kasatkin S.B.**  
Slow generalized waves and generation of vortical structures in acoustics in layered media

### SEA TECHNOLOGY FACILITY AND METHODS OF UNDERWATER RESEARCH

**52 Dulepov V.I., Kochetkova O.A., Venzik A.V.** Application of GIS-technologies for ecological investigations of the coastal sea water areas and inventory of the sources of their pollution

**58 Bezotvetnyh V.V., Burenin A.V., Kamenev S.I., Morgunov Yu.N.** System of sound underwater communication with use complex phase-manipulated signals and time-reversal mirror

**63 Kamenev S.I.** Signals with the improved characteristics on the basis of Barker's sequences for the application in the acoustic systems
